MAYORAL PROCLAMATION
21st Century Water Infrastructure

WHEREAS, water infrastructure is critical for the economic vitality, environmental health and quality of life within New Jersey cities; and
WHEREAS, the City of Perth Amboy has combined sewer systems periodically discharging untreated wastewater and stormwater into the Arthur Kill and the Raritan River during wet weather events; and
WHEREAS, inadequate sewer and stormwater systems generate stormwater runoff and combined sewer overflows (CSOs) that pollute streams, lakes, rivers and bays, and cause localized flooding of streets and properties and can cause sewage backups into neighborhood basements and streets threatening human health; and
WHEREAS, inadequate drinking water systems can rupture, interrupting service and causing flooding; and
WHEREAS, the City of Perth Amboy has received a new CSO permit from the New Jersey Department of Environmental Protection requiring it to adopt and implement a plan to upgrade its combined sewer system; and
WHEREAS, aging and degrade drinking water wastewater and stormwater infrastructure threaten to disrupt daily life, commerce and industry in communities; and
WHEREAS, budget constraints and expensive capital requirements and ongoing operating costs to address these issues can pose major financial challenges; and
WHEREAS, the City of Perth Amboy can make additional investments in 21st century water infrastructure in order to:

- Strengthen the city by protecting public health and the environment and enhance attractiveness and livability while making it more resilient to extreme weather events and natural disasters; and
- Enable economic growth by delivering, reliably and efficiently, safe and adequate drinking water, wastewater and stormwater management services that meet the need of city resident and businesses today and into the future; and
- Leverage modern practices by employing state-of-the-art technologies and best management practices that generate multiple benefits – economic, including but not limited to cost savings, job creation, and new business creation, environmental, including and not limited to improved water quality; and social, including but not limited to better quality of life; and
- Reduce flooding and energy use, including reduction of localized flooding from storms and water-main breaks [and sewer overflows], and enhancing energy efficiency in order to reduce water utility costs and air pollution; and
- Draw on multiple funding sources and maintain affordability by establishing adequate, sustainable funding streams to support improved water infrastructure and services while ensuring affordable rates over time for city residents and businesses.

NOW, THEREFORE, I, Wilda Diaz, Mayor of the City of Perth Amboy, do hereby proclaim that the City of Perth Amboy endeavors to commit to the following actions in support of 21st Century Water Infrastructure:

- Urging state and federal leaders to support our efforts to upgrade our drinking, sewer and stormwater systems and to promote investments in water infrastructure nationwide through financial and technical assistance;
- Upgrade our drinking sewer and stormwater systems in ways that will strengthen our city by employing best practices as the “Best Practice Solutions for Water Infrastructure in Summary” below.
- Sharing our solutions, success stories and annual progress with other municipalities and sewer utilities, through the Urban Water Solutions Initiative.

GIVEN, under my hand and the Great Seal of the City of Perth Amboy, this tenth day of August in the year of our Lord two thousand and fifteen.

[Signature]
Honorable Wilda Diaz, Mayor
City of Perth Amboy
