

Join us at this year's Jersey Water Works Conference!

The [Jersey Water Works 2026 Annual Conference](#) is where water utility leaders, community advocates, and policymakers turn complex water infrastructure challenges into equitable opportunities. Grounded in our collective mission of shared actions, this year's convening focuses on navigating critical regulatory shifts—including aggressive lead service line replacements, new PFAS regulations, and aging combined sewer overflows.

Join over 250 state and local leaders, practitioners, and stakeholders to address the urgent need for investment in New Jersey's water systems, connect with peers to explore solutions, and recognize the collective efforts advancing our state.

Driving the Change: Shared Action for New Jersey's Water Future

- **[Register](#) for the 2026 JWW Conference.** Join us on Tuesday, December 8, at NJIT in Newark, NJ.
- **Engage with local businesses, higher education, and organizations** at exhibitor tables, attend up to four of the twelve sessions, and participate in workshop discussions.
- **Exchange practical insights and get expert guidance.** Bring your water utility and stormwater management questions to the Jersey Water Works 2026 Conference. Connect directly with state leaders and industry peers.
- **Support the Event:** [Sponsorship opportunities](#) are now available! Partner with us to showcase your organization's leadership and directly contribute to our shared mission.

Tuesday, December 8, 2026

New Jersey Institute of Technology (NJIT), Campus Center – Ballroom (2nd floor)
150 Bleeker Street, Newark, NJ 07102
